Instruction Manual

Setting The Standard

Warning!

High pressure gas and gas equipment can cause serious harm to both infrastructure and personnel if safety precautions are not followed.

Oasis recommends considering the use of the following PPE when working with high pressure along with any other site specific health and safety requirements:

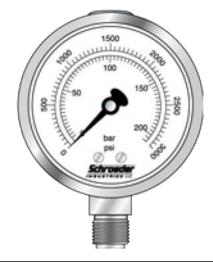

Foot Protection Hearing Protection Safety Helmets Hand Protection Safety Glasses

Ensure the system is clean of debris, vented and isolated before any installation or servicing work is carried out.

Tools Required

Anaerobic Thread Sealant with PTFE (Optional)

- Loctite 567 - Swagelok SWAK
- Hernon Dripstop 940
- Gasoila FasSeal-ATS
- Or Similar

- Yellow, Gas Rated, PTFE Thread Tape - AW TITASEAL - McMaster-Carr High-Density Thread Sealant Tape - Blue-Monster gas-guard
- Or Similar

Spray bottle (Snoop or suitable equivalent)

Spanner

(Wrenches)

Anti Seize Grease

(Krytox GPL-205)

For All Threads

Krytox lubricant GPL-101 or GPL-103

Oasis Engineering Ltd. 129 Birch Ave, Tauranga, 3110, New Zealand, Ph +64 7 9283808, info@oasisngv.com, www.oasisngv.com

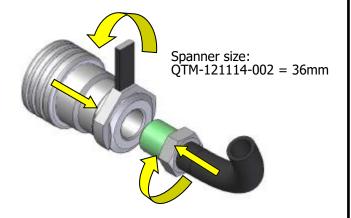

Installation Instructions

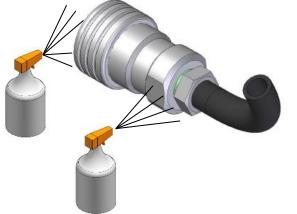

Setting The Standard

NPT Threads

- 1. Apply thread tape and thread sealant. Please ensure that the tape covers all threads, but does not overlap the end of the fitting 3 to 4 turns
- (Optional) If galling is a concern or unable to cover all threads, apply a light coating over thread tape and uncovered threads.
- 2. Join and tighten the connection.

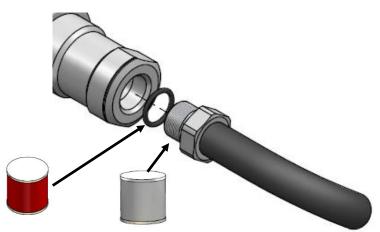

3. Installation complete, check for leaks with snoop or soapy water.

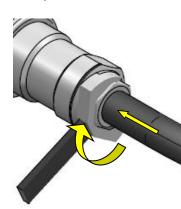

SAE Threads

1. Apply anti seize to thread and Silicone grease to the O-ring. Install the O-ring on the fitting if not pre-installed.

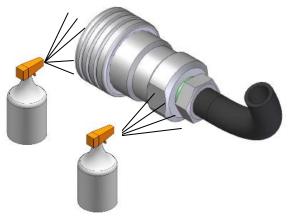

2. Screw the fitting into the body and torque to the fitting suppliers recommended tightening torque.

If recommended torques are not available SAE J1926-2 should be considered for suitability. 3/4"-16 SAE = 85Nm 1 5/16"-12 SAE = 270Nm.

Spanner size:	
HC404-HSXSP-F	= 36mm
HC404-HDXSP-F	= 36mm
HC404-HDXSP-M	= 36mm
HC404-HSXSP-M	= 27mm

3. Installation complete, check for leaks with snoop or soapy water.

Oasis Engineering Ltd. 129 Birch Ave, Tauranga, 3110, New Zealand, Ph +64 7 9283808, info@oasisngv.com, www.oasisngv.com

Operation Instructions

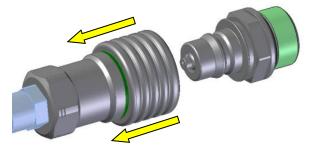

Setting The Standard

Connecting Coupler

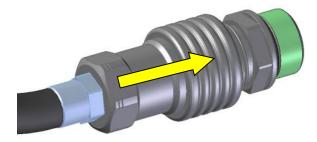

1. Remove the dust cap

2. Pull back and hold sleeve on female coupler

3. Push onto male fitting.

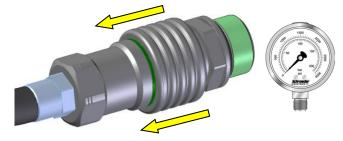

4. Sleeve should click forward into place and the green ring should be visible.

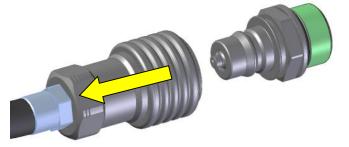

Green ring is only visible when correct coupling is achieved. If it is not visible return to step 1. and re-attempt connection

Disconnecting Coupler

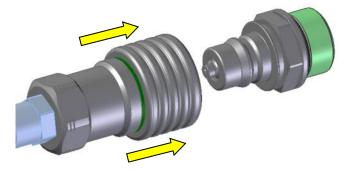

1. Vent coupler pressure, then pull back sleeve on the female coupler.

2. Pull away from the male fitting.

3. The sleeve should return forward and the green ring will be visible.

4. Replace dust caps

Service Kit Parts

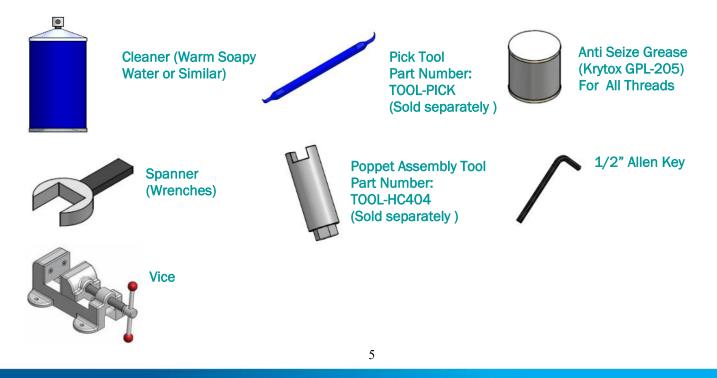

Female/male kit

The Complete Oasis Seal Kit must be used

* This kit may contain spare O-rings for SAE connections depending on what product is being serviced.
only required for female coupler servicing, discard if not required.

Tools Required

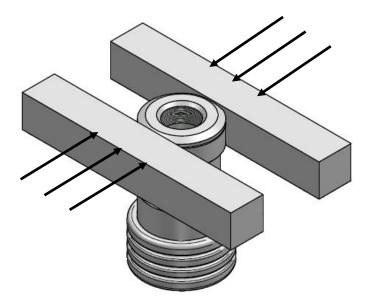

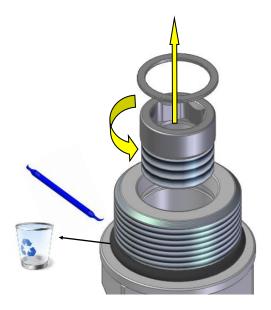

Servicing - Disassembly Female coupler

Setting The Standard

1. Clamp female coupler in vice.

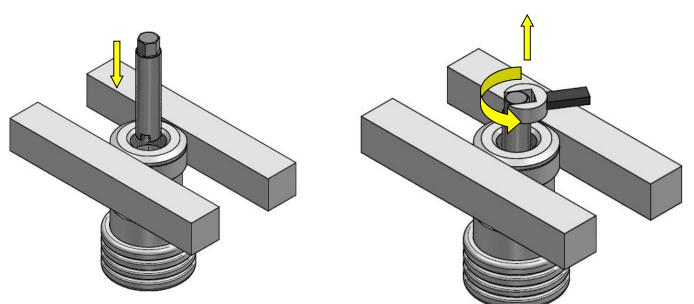

2. If installed remove the retaining clip, flow restrictor and O-ring (HC404-HDXSP-F only). Use a sharp pick for the clip and a 1/2" Allen key for the restrictor. Discard the O-ring only

3. Insert the HC404 retainer tool so that it locates on the poppet retainer.

4. Remove the poppet retainer using the assembly tool and spanner.

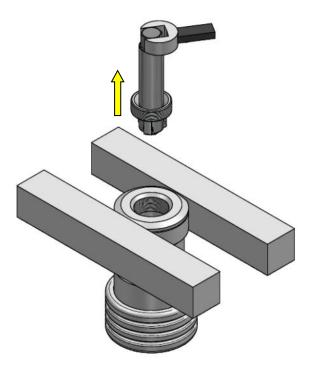

6

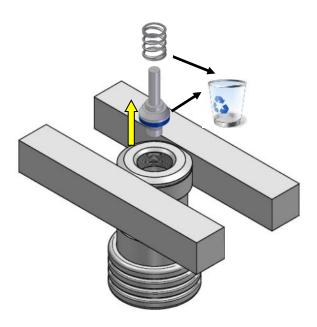

Setting The Standard

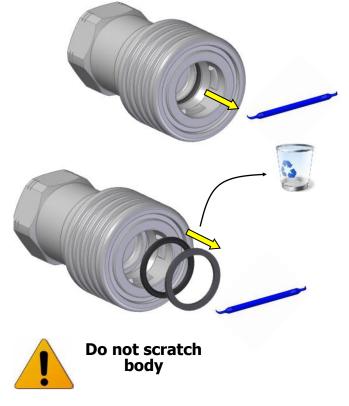

5. Remove and keep the poppet retainer.

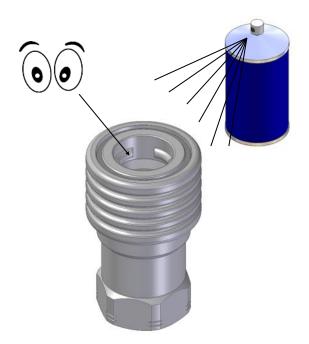

6. Discard the poppet and spring.

7. Pick out the O-ring and Backup and discard.

8. Clean all of the components and visually inspect parts for damage.

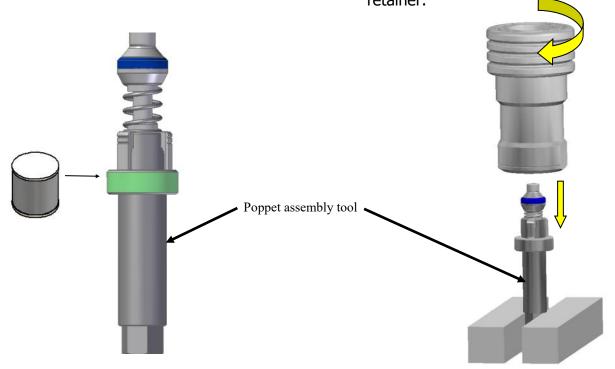

Servicing - Assembly Female coupler

Setting The Standard

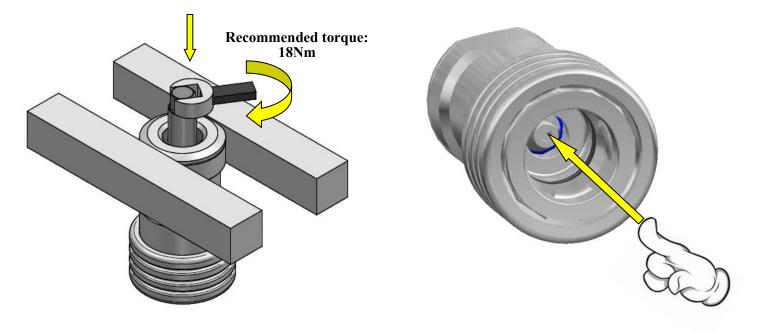

1. Apply anti-seize to the female poppet retainer thread.

2. Screw the female body onto the poppet assembly. Be careful not to cross thread the retainer.

3. Tighten the female poppet retainer.

4. Check the poppet by pushing the poppet with your finger and ensure it returns when you release it.

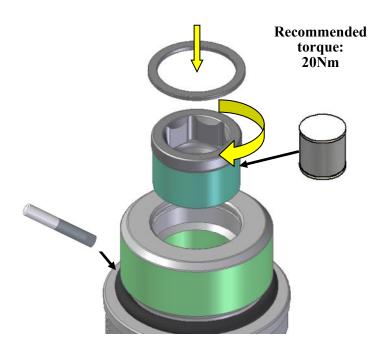

6. Apply lubricant and insert the O-ring and

back-up into the groove.

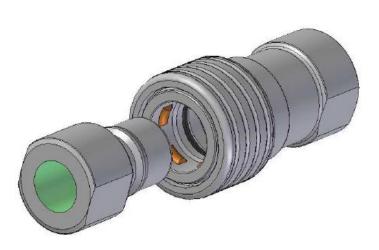

Setting The Standard

5. HC404-HDXSP-F 1" SAE thread only. Apply supplied lubricant to the O-ring and install. Apply anti-seize to the flow restrictor and tighten in place to 20Nm using a 1/2" Allen key. Install the retaining clip.

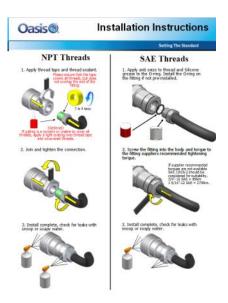

Backup O-ring

7. Test the connection of the female coupler on a male. Check for correct coupling and the at poppet fully returns on disconnection.

8. Re-install coupler as per the install instructions on page 3 of this manual.

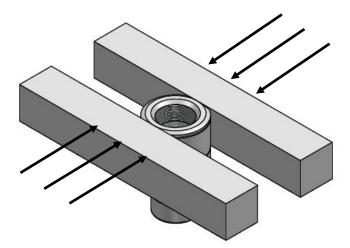

9

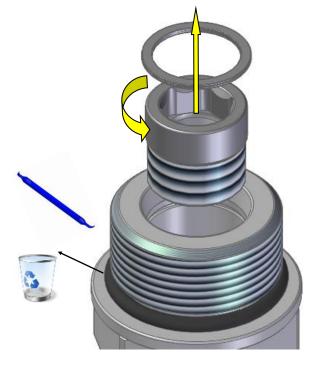

Servicing - Disassembly Male coupler

Setting The Standard

1. Clamp the male coupler in the vice.

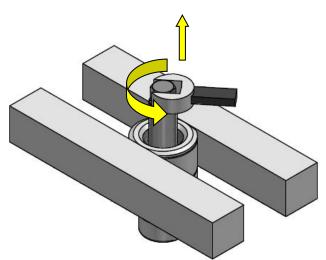

2. If installed remove the retaining clip, flow restrictor and O-ring (HC404-HDXSP-M only). Use a sharp pick for the clip and a 1/2" Allen key for the restrictor. Discard the O-ring only.

3. Insert the Poppet Assembly Tool.

4. Loosen the poppet retainer using the assembly tool.

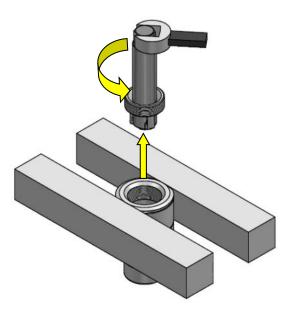

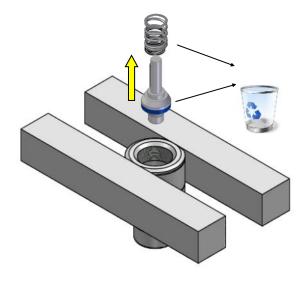

10

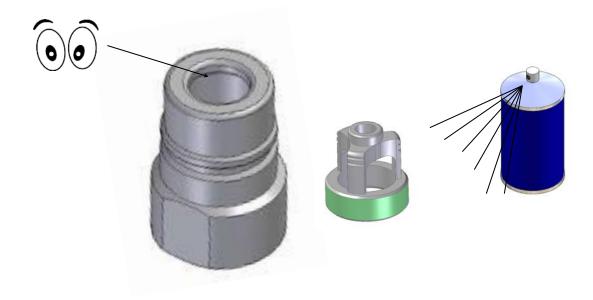

Setting The Standard

- 5. Remove and keep the poppet retainer.
- 6. Discard the poppet and spring.

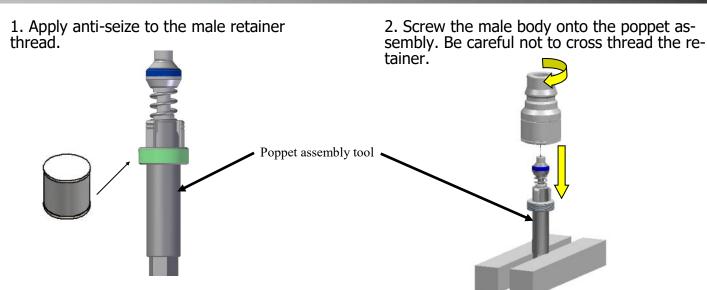

7. Clean all of the components and visually inspect parts for damage.

MEMBER OF THE ELAFLEX GROUP

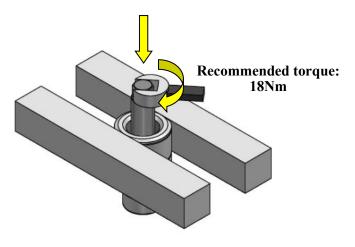

Servicing - Assembly Male coupler

Setting The Standard

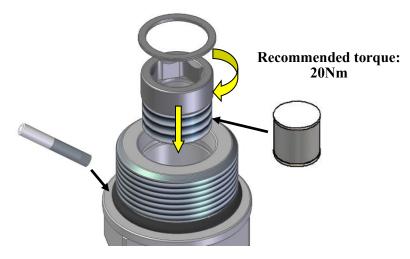

3. Tighten the male poppet retainer.

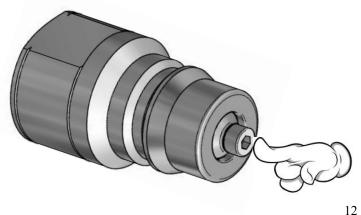

Oasis

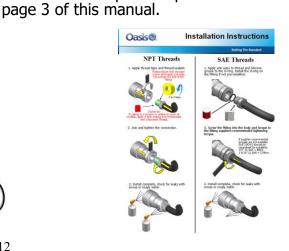

4. HC404-HDXSP 1" SAE thread only. Apply supplied lubricant to the O-ring and install. Apply anti-seize to the flow restrictor and tighten in place to 20Nm using a 1/2" Allen key. Install the retaining clip.

5. Male coupler servicing complete. Check connection with a female coupler and that the poppet fully returns.

6. Re-install couplers as per the install instructions on
