

Applications

High Flow TPED ball valves for trailer use worldwide.

Suitable for Hydrogen, CNG, Biogas, RNG, Helium, Nitrogen.

BV908-6N6TCDW-G000

Materials

Item	Part	Material
1	Body & Cap	Stainless Steel
2	Ball	Stainless Steel
3	Stem	Stainless Steel
4	Seats	PEEK

пеш	rait	Material
5	Thrust washer	POM
6	Gland	POM
7	O-rings	FKM
8	Backup rings	NBR
9	Handle	Stainless Steel

Product Information

Type tested to ISO23826.

Complies with TPED 2010/35/EU.

CRN pending.

All products are manufactured to ISO 9001 standards.

NPT threads conform to ASME B1.20.1.

SAE threads conform to SAE J1926.

BSP threads conform to ISO 228.

DKOS connections conform to ISO 8434-1.

Tube connections available.

Other connections available on request.

Custom handles available on request.

End users shall consider the pressure and flow of the system to which the valves are installed.

We reserve the right to modify product specifications without prior notice.

Features & Benefits

Suitable for 385 bar working pressure trailers.

Easy to service, kits readily available.

Quarter turn handle.

Anti blow-out stem.

Manufactured from certified bar stock.

Lockout system available to prevent accidental operation of valve.

Actuated options available.

- * Lowest settled gas pressure for which the ball valve is designed. This is the minimum pressure that the product will hold constant bubble tight seal.
- ** Settled pressure of a compressed gas at a uniform reference temperature of 15°C in a full pressure receptacle for which the valve is intended.
- *** Minimum pressure applied to the valve during testing
- The temperature's and cycles stated depend on the system conditions and may not be achievable in all situations. Contact Oasis for further information.
- ^^ Maximum opening torque at maximum operating pressure.
- ^^^ TPED-certified to 65 °C, evaluated by Oasis to 85 °C, which exceeds certification scope and must be verified by the system designer.

 Contact Oasis for further information.
